Profile

Early-career software engineer focused on backend and platform work, with hands-on experience across enterprise CI/CD security, product development, and published research. At GE Digital, integrated automated scanning into ~72 AWS pipelines in Jenkins using Bash and Groovy; currently building local-first developer tooling and contract software solutions using C#, Java, Python, and TypeScript.

Experience

DeliveraSoft

Mar 2025 – Present

Software Engineer (Contract)

London, UK

- Build software and automation solutions for small businesses in a lean two-person setup, spanning backend logic, data cleaning and normalization, landing pages, and technical troubleshooting.
- Work directly with stakeholders to turn ambiguous requirements into practical deliveries and iterate quickly on feedback.
- Contribute to client-facing digital assets while balancing engineering pragmatism with time and scope constraints.

Middlesex University

Jun 2025 – Present

Outreach Contractor / Workshop Lead

London, UK

- Deliver talks and workshops for schools and prospective students; regularly explain technical ideas to non-technical audiences and represent the university externally.
- Draw on strong presentation, workshop, and stakeholder-management skills developed through ambassador and student leadership work.

GE Digital

Jun 2023 – Sep 2024

Software Engineer Intern

Cambridge, UK

- Integrated automated Nmap scanning into ~72 AWS CI/CD pipelines in Jenkins using Bash and Groovy, reducing manual release checks and improving pre-release security coverage.
- Maintained and extended a legacy Smallworld/Magik codebase: fixed bugs, improved database interactions, added MUnit tests, and documented pitfalls to support reliability and onboarding.
- Worked with DevOps engineers and security architects on release-process hardening across a large enterprise environment.
- Received the GE Spotlight Award for “Deliver with Focus” for proactive ownership of a security-driven delivery initiative.

Middlesex University

Apr 2025 – Present

Researcher & Lead Author

London, UK

- Led research on the N-Person Iterated Prisoner’s Dilemma, designing simulations and analysis around cooperation, voting mechanisms, and reward-space effects.
- Published lead-author work in Springer proceedings for SGAI-AI 2025 and presented the paper as conference speaker.

Selected Projects

Taskdeck

Local-first execution workspace for developers centered on proposal-first automation, capture/inbox workflows, provenance, and explicit apply; designed so automation stays reviewable rather than silent. *C#, .NET 8, Vue 3, SQLite*

Collaborative Fintech Strategy Platform

Co-developing a data-driven options strategy platform with a configurable backtest engine parameterized from database-defined combinations and strategy settings. *Python, FastAPI, React, TypeScript*

N-Person Prisoner's Dilemma Research Platform

Built a simulation and analysis framework for multi-agent cooperation research, supporting experiments, visualization, and publication-quality analysis. *Python*

EduHub

Built a full-stack application for discovering and booking after-school lessons, including search, filtering, cart/favorites flows, validation, and RESTful APIs. *Vue.js, Node.js / Express, MongoDB*

Education

Middlesex University

Graduated Jun 2025

BSc (Hons) Computer Science with Industrial Placement, First Class Honours

London, UK

Relevant study included full-stack development, AI and algorithms, data science and machine learning, software engineering, operating systems, and computer networks.

Publication & Awards

Tcaci, C.; Huyck, C. "Navigating the N-Person Prisoners' Dilemma: From the Tragic Valley to the Collaborative Hill." *Artificial Intelligence XLII / SGAI-AI 2025*, Springer. Lead author and presenting speaker.

GE Spotlight Award – Deliver with Focus

Dec 2023

Recognized for leading an essential DevSecOps initiative that integrated automated port scanning into AWS-based CI/CD pipelines.

Leadership & Service

Middlesex University

Nov 2024 – Jul 2025

Student Voice Leader

London, UK

- Gathered and presented student feedback to faculty and departmental boards, helping translate student concerns into constructive recommendations.

Middlesex University

Nov 2024 – Jun 2025

Student Ambassador

London, UK

- Represented the university in information sessions, campus tours, and open-day activities while strengthening presentation and communication skills.

Skills

Languages: C#, Java, Python, TypeScript, JavaScript, Bash, Groovy, SQL

Backend / Platform: .NET, FastAPI, Node.js / Express, REST APIs, Jenkins, Docker, AWS, CI/CD, Git, Linux

Databases / Data: SQLite, PostgreSQL, MongoDB, Pandas, scikit-learn

Also: Smallworld/Magik, MUnit, testing, developer tools, secure automation, basic Kubernetes familiarity
